

Huntington Ave Plaza
Boston, MA

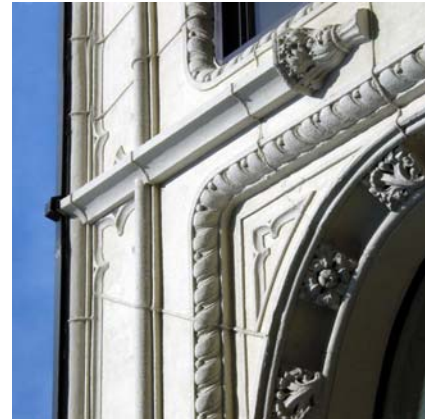

Initially this work entailed a comprehensive exterior restoration for a city block of retail and office spaces fronting onto Huntington Ave just west of Symphony Hall. This restoration included new window systems, storefronts, and façade elements of divergent materials required sealing to create a watertight façade.

Since this first project, PAF has been commissioned to provide various space planning and food services planning to the management of this property.

The food services work has been done for the management company, and for the Burger King franchise, and for the Panera Bread franchise. Additional work has been done for offices on the upper floors.
